

# Tokyo, Japan

Quintiles Transnational Japan K.K. is the largest contract pharmaceutical organization (CPO) in Japan. In a further extension of the company’s Pan-Asian activities, Quintiles Laboratories has contracted with Medca Japan to provide central laboratory services in support of clinical trials in Japan.

Our Tokyo facility is College of American Pathologist (CAP)-certified and staffed by Quintiles Laboratories’ own highly-trained technicians embedded within Medca. Thus Quintiles can assure consistency with our global practices for accessioning, project management support, data capture and specimen management and storage. Quintiles also has dedicated space within Medca for these activities — including sample storage. As a result, we can provide effective and efficient services for pharmaceutical companies located inside and outside Japan.

Tokyo joins an existing network of CAP-certified Quintiles Central Labs in Beijing, Singapore and Mumbai. This network of harmonized facilities greatly enhances our customers’ ability to benefit from changes in legislation that now enable the extension of clinical trials normally conducted wholly within Japan to other countries in Asia. Because Quintiles labs are harmonized

Location	Saitama, Japan
Size	Total: 1,000 square feet Staff of: four
Certifications	CAP-certified
Quality Assurance	Subject to Global QA and ongoing monitoring programs

throughout the region, results from a patient in Tokyo are directly comparable to those from a patient in Singapore, Beijing, or anywhere else on the globe.

In Japan, Quintiles Laboratories offers a broad range of laboratory services. The laboratory has undertaken specimens for examination from about 4,000 medical institutions throughout Japan.

### Part of a Truly Global Network of Clinically Harmonized Central Labs

Quintiles offers a local presence — in Japan as well as anywhere in the world you wish to conduct a study. Over time we have developed key relationships in local regulatory and shipping communities. This gives us the ability to support investigators in Japan, elsewhere in Asia, or around the globe — with kit building, protocols and logistics, plus a familiarity with local languages and customs.

Because we have greater control over every step of the process, choosing Quintiles ensures uniform instrumentation and standard operating procedures (SOPs).

### Benefits

- > The quality, flexibility and speed needed to run an efficient clinical trial
- > Pan-Asian footprint includes Beijing, Singapore, Mumbai
- > Harmonized with Quintiles Global Central Laboratories
- > Medca Japan experience and reach
- > Proven analytical capabilities
- > Full Service:
  - Protocol Planning and Management
  - Sample Management and Archival Services
  - Laboratory Reporting
  - Investigator Services
  - Quality Assurance
