

- Immunoassay Services

### Immunoassay Services

- Ligand Binding Assays
  - ELISA
  - Mesoscale (MSD) Electrochemiluminescence (ECL)
  - Luminex
  - Neutralization Antibody Assays
  - Cell-based Assays
- Macromolecule Pharmacokinetic Assays
- Immunogenicity Assays
- Biomarker Assays
- Technical Transfer for Developed Assays
- Novel Assay Development
- Assay Validation
- Preclinical/Clinical Sample Analysis
- Sample Management and Storage

Advion is a premier bioanalytical service laboratory. Collaborate with Advion and expect quality, flexibility, timeliness, and a commitment to scientific excellence.

## Why Choose Advion?

### Method Development and Validation

Advion's scientists have extensive experience developing and validating a variety of immunoassays, including ELISA, MSD, Luminex, and cell-based immunoassays. This experience allows Advion to offer its clients project-based and cost-effective services.

- Develop and validate custom-designed assays
- Transfer of existing bioanalytical methods

### Quality

All studies are conducted under rigorous guidelines for quality control. All GLP studies are audited from sample receipt to final report by experienced auditors from Advion's Quality Assurance Unit.

### Client Support

As a leading bioanalytical service provider, Advion understands not only the value of its partnerships, but also the importance of meeting client needs. All studies are assigned an experienced project leader who is available to answer questions at any time. Whether there are questions about timelines, deliverables, or procedures, Advion's scientists are dedicated to providing answers accurately and efficiently.
