

Patient centric approach:

Educational nurse: education of medical staff for correct usage of devices

Challenge

Customer company: Leading company in **cardio-vascular disease**
 Challenge: Train the trainer on correct implementation of **screening methodology**
 Target group: Nursing from primarily **cardiology, neurology**, plus some other departments

Solution

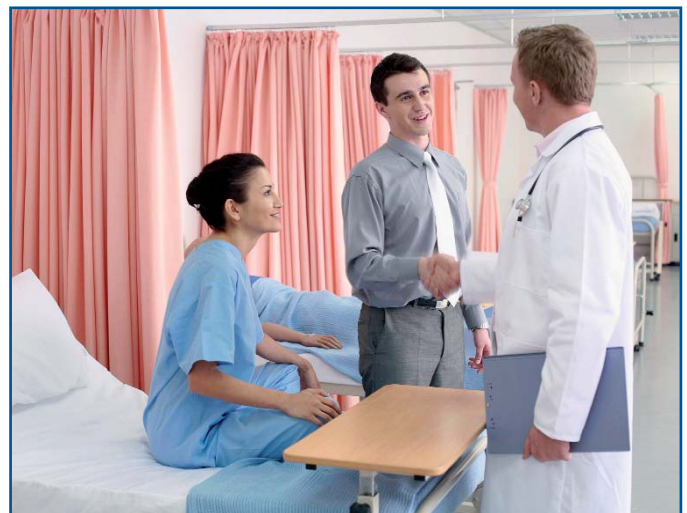

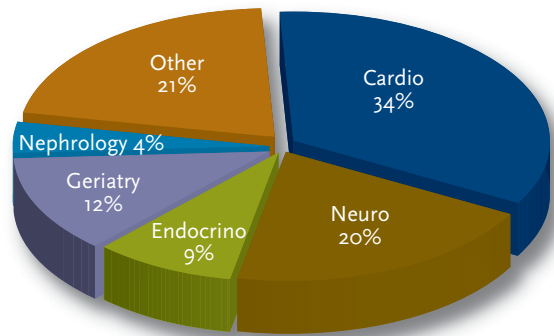

5 nurses for inclusion of departments, and training, coaching and follow up of nurses in a peer to peer situation
 Period: 6 months
 Target: 100 hospital departments

Results

71% of all contacted services accepted to participate
 162% of the target in # centers was achieved
 100% of included centers received the full program of training, coaching and follow up.

Centers included for education

The main targeted services participated to the service.

Conclusion

There was a high interest and acceptance of a train the trainer program.

The efficacy of the program increased, if training was followed by a coaching program.
